

Annex 1: partner company data

company data

of contract from:

For the application, configuration and the successful operation of CSN-services the complete notification of certain information are necessary. The following information are mandatory before the conclusion of the CSN-contract.

1. Organisational company data

address of company (service recipient)									
company									
street									
postcode		city					country		
DUNS number			-			-			
supplier number at Audi					in case of connection to Audi				
supplier number at VW					in case of connection to VW				
value added tax number					only necessary for customers from Europe				
tax number					only necessary for customers from Germany				
e-mail address					user independent e-mail address; only necessary in case of using QTS				

divergent invoice address										Necessary if different from service recipient.
company										
street										
postcode		city					country			

contact person for contract										Organisational contact person for contract details.
first name					family name					
function					telephone					
mobile					e-mail					

contact person for network access										Technical contact person for example regarding router configuration.
first name					family name					
function					telephone					
mobile					e-mail					

contact person for HyperKVS										Organisational contact person for use and user administration of HyperKVS, in case of choosing Application-Service for HyperKVS.
first name					family name					
function					telephone					
mobile					e-mail					

Annex 1: partner company data

contact person for VW DMS		Organisational contact person for use and user administration of VW DMS, in case of choosing Application-Service for VW DMS.	
first name		family name	
function		telephone	
mobile		e-mail	

2. Technical company data

The amount of necessary information depends on the chosen provider and the selected connection type.

2.1 Choice of CSN-Provider-Service:

connection type	provider	details	choice
Internet-VPN	OS	number of token	
Extranet Solution ENX Remote Connect Private Office Connect via T-DSL	T-Systems	bandwidth	
Extranet Solution ENX Remote Connect Private Office Connect via T-ISDN		number B-channels	
Extranet Solution ENX Fixed Connect		bandwidth	
ENX / ANX	diverse	bandwidth	
		name provider	
local standard fixed line (SVF)	COM-IN	bandwidth	
	WOBCOM	bandwidth	
IVPN OffNet	BT	EU or non-EU	
VPN Company Dialog ISDN	Vodafone	number B-channels	
VPN Company Dialog ADSL flat		bandwidth	
VPN Company Dialog SDSL flat		bandwidth	
VPN Company DSL Complete		bandwidth	
VPN Company Net fixed line		bandwidth	

2.2 User data in case of using Internet-VPN:

no.	first name	family name	e-mail address
1.			
2.			
3.			
4.			
5.			

2.3 Details of the local network:

The information in this chapter is mandatory for all kind of connection types except Internet VPN and ENX to realise the technical Implementation (e.g. NAT). It is possible to specify network areas.

	IP-address in your LAN	netmask in your LAN
Internal network e.g. 192.168.0.0 / 24		
provider router You have to assign an IP-Address for the Ethernet-interface of the provider router , e.g. 192.168.0.1		
OFTP-Server Internal IP-address of the local OFTP-client or server, if you chose the service OFTP.		
Default Gateway If your computers are reachable via an additional router, firewall or a proxy, than you need to inform us about the internal LAN-address of this Default-Gateway in order to configure this on the provider router.		
Additional Subnet that need to be routed If you have more than one subnet that needs to use this connection, please inform us about the IP-addresses.		
Miscellaneous / notes		

2.4 Connection details (depending on connection type):

Only in case of Internet-VPN BT Offnet

public static IP-address and netmask (provided by your local Internet Service Provider)	
Public IP-address of the gateway (next hop) in direction to Internet (provided by your local Internet Service Provider)	
Bandwidth of Internet Connection and name of Internet Service Provider	

Only in case of Extranet Solution ENX

ENX registration number	
ENX solution number	
ENX IP-address(es)	
IP-Address of IPSec-gateway (tunnel endpoint) Please specify, if your ENX-provider is not T-Systems.	
Bandwidth	

3 Contact person at Volkswagen or Audi AG

The following information are necessary, to get the authorisation from Volkswagen respectively Audi AG for access to the partner net or some specific applications.

3.1 Contact person, to confirm the access to the partner net

Contact person at AUDI (AUDI-Pate)		The information regarding this contact person are mandatory in case of a new contract or change of an existing contract to the Audi network. In case of using only HyperKVS or QTS this information is not necessary. For such a case please fill in point 3.2 or 3.3.	
name			
function		telephone	
department		e-mail	

Contact person at VW (VW-Pate)		The information regarding this contact person are mandatory in case of a new contract or change of an existing contract to the VW network. In case of using only HyperKVS this information is not necessary. For such a case please fill in point 3.2.	
name			
function		telephone	
department		e-mail	

3.2 Contact person, to confirm the access to HyperKVS

Contact person at AUDI for HyperKVS (KVS-Pate)		The contact person for HyperKVS at Audi works normally in a development department and can be the same contact person like number 3.1.	
name			
function		telephone	
department		e-mail	

Contact person at VW for HyperKVS (KVS-Pate)		The contact person for HyperKVS at VW works normally in a development department and can be the same contact person like number 3.1.	
name			
function		telephone	
department		e-mail	

3.3 Contact person, to confirm the access to QTS

Contact person at AUDI for QTS (QTS-Pate)		The contact person for QTS at Audi works normally in a quality department and can be the same contact person like number 3.1.	
name			
function		telephone	
department		e-mail
